L) Suggestions if any

Permanent campus should be built as soon as possible. The laboratory and equipment for experimentation should be full-fledged and more diverse to allow students to dig dip their knowledge and interest. A job oriented study plan is required, and campus selection for the students of the course is needed. Library should contain a more diverse content related to subject. Software related study should be imparted to M.Sc. students and Do-main Id should be given to M.Sc. students to let them work more freely in scientific research field and this will also inculcate a feature of making publications.

Small small management games like team building exercises, ad making exercises , case studies, marketing games should be included mandatory in the syllabus as it improves the understanding of the concept and the students will get an opportunity to explore their potential and leadership traits. It will be very helpful for the students to identify the areas where they are lacking and they can work on it to improve.

K) Suggestions (if any)

Mess and hostel facilities are very poor instead of regular complaints, there is nothing in the name of extra-curricular activities, recreational activities and sports facilities for students in their free time. There should be appropriate sports equipment available for students , proper gym equipments should be there because the existing gym is on ventilator. When we joined CUJ in 2015, there were proper coaching which was given to students for specific sports, this should again start.

Better opportunities for students open when they are exposed to labs or related work fields compared to totally doing all the course work in the university. This helps the students to figure out what they want to do as soon as they complete the course.

The teacher to student ratio is high. Not enough teachers to complete the syllabus. PhD scholars are asked to teach students of 5th year. The situation is very critical. Whole point of studying is mugging up the answers and scoring 9SGPA. Practicals are done only for the namesake. Kindly increase the number of teachers. very bad situation.

The administration of University is the worst among all. They sit all day long without doing any work and when students go for their problems they scold them. The marksheet of 4th sem is not published while the student reaches final year. The wifi of the hostel is not working since 15 months and they don't pay heed. On complaint they say, "we don't have time and money." I highly demand to scrap off all the administration and start recruiting fresh candidates. Vice chancellor doesn't pay attention to the problem of students. He is busy with his so called trustworthy person who are corrupt as well. The DSW has problems with students and he is very unsupportive. Doesn't talk properly to students and listen problems. No pure drinking water facility in hostels. Situation is very critical.

Our department should arrange some workshops and seminars not only to give exposure to the students but also to increase their creativity and their ability to manage academic sessions. The students heading towards academics in future will be benefited with that.

The professor or the teaching staff who are teaching us must be of the same subject background as the paper he/she is teaching. For post graduation courses this condition should be mendatory for better outcome.

In MSc courses our syllabus should be more practical rather than theoretical.

There should be at least basic lab facilities in laboratories. Shortage of basic equipments
in laboratory is disastrous if you are conducting MSc courses.

Placement should have been taken care for the students, doing a course and getting a degree is not an ultimate goal for the students; they also wish to get placed in some good organisation. During my time in CUJ, my batch placement cell was not so developed and initiative by everyone was not at par which disappointed many of the students and it took time for many to get jobs on their own.

Convocation should be organized at the earliest so that we can receive our original degrees and Also for MBA students, university should provide additional specialization certificate to all the students for the major subjected opted by them so that they can get job based on their interest area.

It has been 4 years from completing the course (2nd Batch-2010-2015) but still the convocation is awaited and we are waiting for original degrees/academic appreciation if any and the delay is still there on the part of the university. So, I would suggest the administration to kindly speed up the procedures and organize our convocation at the earliest, this will lead to ultimate satisfaction on the part of all the students.

Also for MBA students, university should provide additional specialization certificate to all the students for the major subjected opted by them so that they can get job based on their interest area.

Internship durations if possible, must be more than just a month so that companies do have an opportunity to entertain the students for such internships. Also, Industrial Tours to be made mandatory to understand the dynamic environment of working. More of professional interaction to mould the students for the future.

K) Suggestions (if any)

The major problem of getting things done on time through the administrative offices must be resolved as soon as possible. Getting things done physically is another problem and you need to be present each and every time to get the job done. A web portal is a must where students can have access to each and every academic record of the student, particularly a student's portal is need of the moment. A chain of command needs to be fixed. Authority and responsibility needs to be fixed. Communications need to be made on time regarding examination schedule. Books are scarce and books which are available for reference to competitive exams are inadequate and out of date, library timings need to be extended and also opening of the library on holidays. 24X7 Medical Facilities needs a check. Computer labs to be well equipped and modernized. And, student bus facility for hostellers if possible on Saturdays and Sundays.

Suggestions for further improvement:

A new campus was promised since my son's admission and he has passed out on July'18 and the university is still where it was. Instead, of improving the current university facilities try to get to

the new campus which would make things fall in place for everyone.-----

Suggestions for further improvement:

---The overall course structure is poor and not according to the current standards of other similar courses being taught in other universities. The curriculum is outdated and no proper skills and tools which are relevant in the real world scenario are taught. From the feedback of my ward Mr Dipankar, I came to know that most of the things taught in his course is irrelevant and not useful in current scenario. Moreover there is nothing regarding job placements, and no administrative body that gives timely feedbacks to the students and updates on companies being interested or invited. --Students are unaware of the skills in the job market and no proper help is given to them regarding that. No placement brochure is present for the department of my ward, so there is no question of companies being invited to universities. -----

For improvement, the course structure should be updated in accordance with industry demands and new skills and tools relevant to this course should be brought into practice. There should be proper student teacher communication as well as timely feedbacks from teachers to guardians.

The lab facilities should be adequate and most importantly **placement cell** for each department should be present who should be in continuous touch with students regarding proper timely feedback regarding corporate sector/ job sector and invite and inform companies regarding student profile to them.-----

_The course structure and syllabi of the department is of Civil Engineering, but the University awards the Bachelor degree in Water Engg and Mgmt. which is completely unspecified. Because of this unspecified degree I am unable to apply for any Govt. jobs opening or any other institution for further studies. The Applied Physics Programme is very well designed with great content and
relevance but only on paper. The execution of the programme by the department
is very poor with focus only on wrote learning and regurgitative assessment.

The Course Geoinformatics is the Science and technology which develops and uses information science infrastructure to address the problems of geography, Cartography, geosciences and related branches of Science and Engineering, but there is lack of Lab facilities because this course is highly challenging for us, it required proper and highly relevant lab facilities, lack of book facilities in the library related to this course.

K) Suggestions (if any)

The university is open to new ideas in Course Curricula and research proposals, collaboration, interaction and capacity building programmes. But, there should be enhancement in the Lab facilities, Library facilities and infrastructure of the university. The placement should be enhanced through the university. It also required enhancement in Education level in the university, the Course offered in university is Challenging so it required some enhancement in education level.
